PROFILE SUMMARY

BCA student focused on Artificial Intelligence, Machine Learning and Generative AI, with hands-on project work in RAG, local LLM applications and classical machine learning. Building practical AI tools in Python while strengthening software engineering fundamentals through projects.

EXPERIENCE

Artificial Intelligence - Internship & Project-Based Learning Program
UNLOX Academy Premier Services | Remote | Oct 2026
- Completed UNLOX's AI internship and project-based learning program under the Job Bridge initiative; the issued credential lists Trivion Technology as the partner organization.

PROJECTS

SourceLens - Domain-Specific RAG Chatbot for PDF Question Answering | GitHub
Python | Streamlit | Qwen2.5-3B-Instruct | Sentence Transformers | FAISS
- Built a PDF question-answering app that extracts text page by page, creates overlapping chunks, generates MiniLM embeddings and retrieves relevant passages with FAISS.
- Used local Qwen2.5-3B-Instruct to select exact supporting passages, show filename/page citations and refuse answers when supporting evidence is missing.

FORM - AI Gym & Fitness Assistant | GitHub
TypeScript | React | MediaPipe | Cloudflare Workers / D1 | Drizzle | FastAPI
- Built a fitness web app with browser-side MediaPipe pose tracking and geometry/state-based rep counting for six exercises.
- Added nutrition, habit and performance features backed by Workers and D1/SQLite, with validation, role-based access, sessions and an optional FastAPI/MQTT integration layer.

CareerLens - AI Resume Analyzer & Job Recommendation System | GitHub
Python | Streamlit | scikit-learn | TF-IDF | Plotly | pypdf | python-docx
- Built a local PDF/DOCX resume analyzer that extracts technical skills from a curated 110-skill dictionary and compares them with 13 role profiles.
- Combined skill coverage with TF-IDF cosine similarity, then added gap analysis, learning roadmaps, custom job-description comparison and PDF reports.

ADDITIONAL PROJECTS

StudyBuddy AI - Ollama + Streamlit | GitHub
Python | Streamlit | Ollama | Llama 3.2 1B
- Built a local study assistant that sends questions to Ollama and displays the response in Streamlit, with connection and timeout handling.

LangChain AI Question Answering Chatbot | GitHub
Python | LangChain | Google Gemini
- Built a command-line Python study assistant using a PromptTemplate -> Gemini -> StrOutputParser chain with input and setup/API validation.

NYC Airbnb Price Prediction | GitHub
Python | Pandas | scikit-learn | Linear Regression
- Prepared 48,895 listings with missing-value handling, 95th-percentile trimming and one-hot encoding; held-out R^2 0.4708 and MAE $38.54.

Diabetes Prediction - Logistic Regression & Random Forest | Logistic GitHub / Random Forest GitHub
Python | scikit-learn | Pandas | Jupyter
- Built two Pima diabetes classification workflows using median imputation; Logistic Regression adds scaling/class balancing, while Random Forest uses stratified 5-fold GridSearchCV.
